*Higher score indicates higher proficiency and comfortability regarding the subject

About Me

I am a passionate and enthusiastic computer science sophomore at The University of Hong Kong who has acquired fundamental knowledge about programming. I am quite comfortable in writing computer programs in some languages. Over the last summer break, I have also obtained basic proficiency in developing web application through learning from the Coursera platform. Recently, I have also had some experience in data science and machine learning through hands-on projects by taking an online course provided by Algoritma. My interests ranges from investing up to arts.
